

Turf Solutions

Professional solutions for golf courses, racecourses, bowling greens and turf farms.

Turf Mark® Blue

Green Lawnger®

Vision Pro®

Impede®

Arsenal® Xpress

Drive®

Wetta Soil® Ultra

Fertilis® Range

Floranid® Range

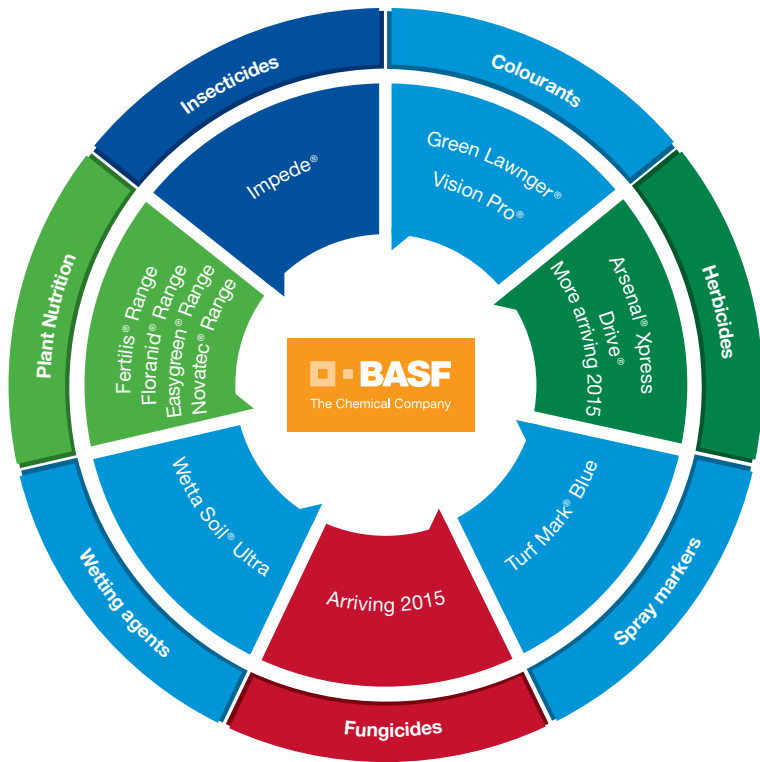

Easygreen® Range

Novatec® Range

 **BASF**

The Chemical Company

A wide range of complimentary turf solutions.

BASF has a comprehensive range of high performing turf products used on some of the world's leading sporting turf surfaces. Australians can enjoy first class performance turf facilities all year round with a little help from BASF. With over 150 years experience in scientific research and development, BASF is a world leader in turf.

Plant Nutrition Range

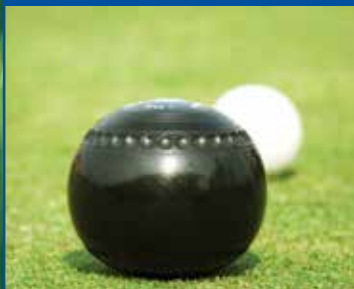

Product	Strengths
Fertilis® Range	<ul style="list-style-type: none"> • Extra fine NPK grade for greens & tees (0.5 – 1.6 mm) • All nutrients in every granule • Including important micronutrients B, Fe and Zn • Including micro-organism <i>Bacillus subtilis</i> • Better root development • Improved turf quality
Floranid® Range	<ul style="list-style-type: none"> • Highly efficient slow release fertiliser for turf • Constant and homogeneous growth • Healthy green colour and better rooting • Better resistance against wear • Environmentally friendly
Easygreen® Range	<ul style="list-style-type: none"> • High quality fine grades • Better sward penetration and therefore less scorching • Optimal and homogeneous spreading • Less visibility of applied product • All nutrients in each and every granule • Each granule contains macro and trace elements • No segregation in nutrients which can happen with blended products
Novatec® Range	<ul style="list-style-type: none"> • Better nitrogen use efficiency • Constant and homogenous growth • Reduced negative environmental impact • Cost effective solutions

	Product	Strengths	High Performance BASF Technology
Spray marker	Turf Mark® Blue	<ul style="list-style-type: none"> • Takes the guesswork out of spraying, making applications virtually foolproof • Perfects applying liquid pesticides and fertilisers • Dissipates quickly in either wet or dry weather, making it the ideal temporary spray colourant • The distinctive colour shows you exactly where you've sprayed, preventing skips and overlaps, and helping to pinpoint drift 	<ul style="list-style-type: none"> • Mixes with water-soluble pesticides and fertilisers • No compatibility limitations • Average application lasts 12–24 hours • Safe, non-toxic, biodegradable • Washes up with soap and water
Colourant	Green Lawnger®	<ul style="list-style-type: none"> • Instantly restores natural green colour to dormant or discoloured turf • Long lasting, no rub off and won't fade to blue with prolonged exposure • Replaces expensive over seeding programs • Reduces water requirements 	<ul style="list-style-type: none"> • ColorLock® with resin technology enabling dyeing to deep shades without staining other materials • Low viscosity and metal load, hence lower weight • Designed for repeated use and to promote plant health • Increased reflectance of potentially damaging NIR light • Formulation/use rates/timings filter of more photosynthetic light for absorption and reflectance of NIR light
Colourant	Vision Pro®	<ul style="list-style-type: none"> • Natural green colour last 1–2 weeks • Pump friendly, no special seals needed • Is tank mixable with quality pesticides for turf applications 	<ul style="list-style-type: none"> • Resistant to adverse effects on prolonged UV light exposure
Insecticide	Impede®	<ul style="list-style-type: none"> • Useful for the control of Argentine stem weevil, Funnel ants and Mole crickets 	<ul style="list-style-type: none"> • Group 2B Insecticide • Uniform biodac granules for better thatch and soil penetration
Herbicide	Arsenal® Xpress	<ul style="list-style-type: none"> • Powerful pre and post emergent weed control in one application • Highly effective knockdown and residual activity on a large range of weeds • Up to 6 months residual control 	<ul style="list-style-type: none"> • Rapidly absorbed through foliage and translocated throughout plants • The active ingredient provides residual control and is also rapidly absorbed through roots, and translocated throughout plants
Herbicide	Drive®	<ul style="list-style-type: none"> • Robust post-emergent control of Summer grass, White clover and effective suppression of Kikuyu • In addition to excellent weed efficacy, Drive also has excellent safety on a wide variety of turf species 	<ul style="list-style-type: none"> • Is absorbed by foliage and the roots and is translocated throughout the plant via both the xylem and phloem
Wetting Agents	Wetta Soil® Ultra	<p>Keeps turf lush looking green all year round by:</p> <ul style="list-style-type: none"> • Promoting better water penetration, reducing watering required • Longest lasting wetting agent available in Australia and New Zealand • Reducing run-off • Reducing disease pressure of dry spot and fairy ring diseases • Ideal for use on newly seeded or hydroseeded turf grass or when planting ornamental trees, shrubs or flowers to greatly reduce irrigation or watering needs 	<ul style="list-style-type: none"> • 100% active and non-ionic, it remains active in the soil throughout the entire growing season, limiting the need for several applications • Available in both a liquid and granular form, Wetta Soil Ultra is one of the safest wetting agents available having no harmful NPEs and a lower burn potential than many other wetting agents • Great rate and depth of penetration into the soil
